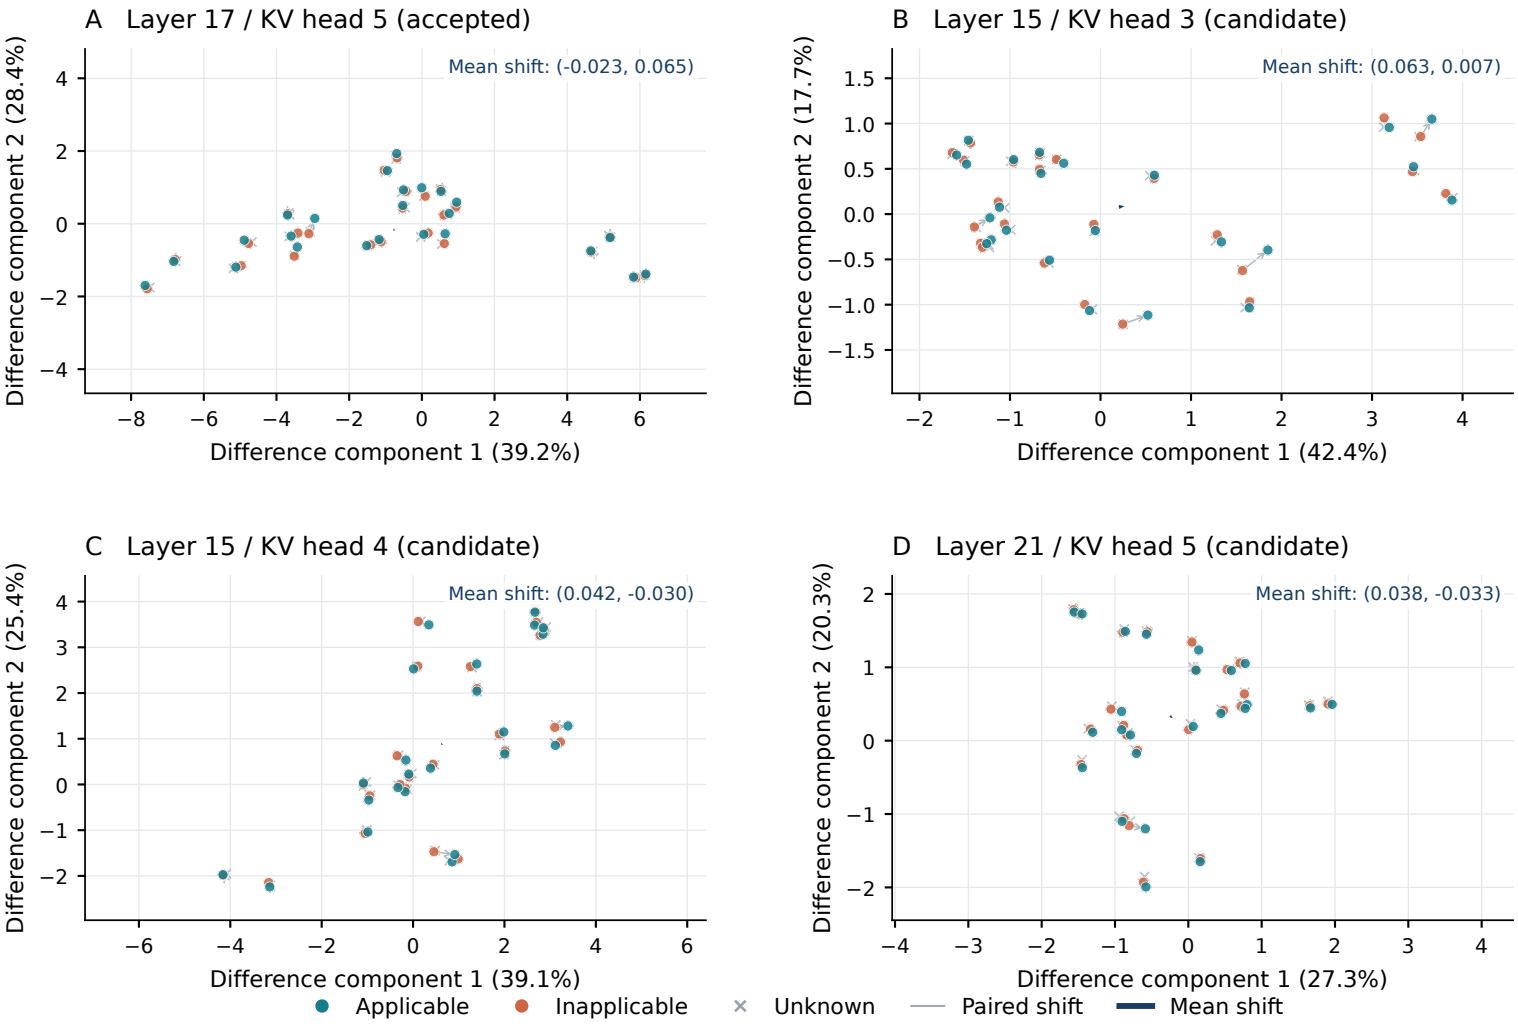
Qwen3-0.6B-Base | Paired applicability shifts

Confirmation pairs in frozen training-difference subspaces

4 candidates ranked on the selection partition; inclusion here does not imply acceptance.



Axes: 6 fitting guidelines. Head ranking: 3 selection guidelines. Points: 3 separate confirmation guidelines.

Gray arrows run from inapplicable to applicable. The dark arrow is the source-guideline-weighted mean.

Axis percentages: fitting-set paired-difference energy. Pair variants are not independent clinical cases.
